CPSE Portal Case Management for Agency Service Providers

What are Unmatched Children and Unmatched Enrollments?

Unmatched Children & Enrollments

- * Typically, all information about a child and the services they are receiving are entered by the County and uploaded into CPSE Portal.
 - * However, your agency can create a temporary child and temporary enrollment records.
 - * These are created when the County is delayed in entering data.
 - * Your agency can create these records so that attendance and other information can be recorded even though the County has not entered the official information.
- * Once the County uploads the official information, then you can “match” the temporary records to the County created record. When matching the records, any data entered for the temporary record is moved over to the County created record and then the temporary one is deleted.
- * In CPSE Portal, these temporary / placeholder entries are referred to as “UnMatched”.
- * Unmatched children do not have an ESID #.

Enrollment and ESID

- * The enrollment should correspond to a unique approved service on the IEP.
- * There will be enrollments for:
 - * Different Service Types (OT vs PT vs ST)
 - * Different frequencies (1x30 vs 1x45 vs 2x30)
 - * Individual vs Group (if the CPSE determines a child should receive some individual and some group of the same service type, they should be separate enrollments).
- * Each County created enrollment has a unique identifier called an Electronic Service Identifier or ESID for short. This is how we reference enrollments.
- * **For HIPPA reasons, do not email child names**, use the ESID #, the Child Number, or the STAC ID #..
