

SED Basics + Getting Started Webinar Q & A

Question Asked	Answer Given
Where do you find a list of error codes for problem children	We do not have a list of error codes for sending STACID Batches. The error code and description will be included on the Problem Children Tab.
Do we need to delete the ERROR every time	No, if the errors are sent, they will just come back as rejections. Removing them prevents them from coming back as rejections so that the problem causing the error can be corrected.
